

ENVISION^{2b}WELL Inc

DBA EnvisionWell

Envision2bwell Inc, DBA EnvisionWell, utilizes enterprise-grade best practices to protect our customers' sensitive health information, and uses Drata to verify its security, privacy, and HIPAA compliance controls.

About HIPAA

HIPAA is a federal law that requires the creation of national standards to protect sensitive patient health information from being disclosed without the patient's consent or knowledge.

Drata's HIPAA product provides an automated approach to ensuring that organizations can demonstrate compliance.

Continuous Security Control Monitoring

Envision2bwell Inc uses [Drata](#)'s automation platform to continuously monitor security controls across the organization. Automated alerts and evidence collection allows Envision2bwell Inc to confidently prove its commitment to protecting your sensitive health information any day of the year, while fostering a security-first mindset and culture of compliance across the organization.

Employee Trainings

Security is a company-wide endeavor. All employees complete an annual HIPAA training program and employ best practices when handling customers' private health information.

Data Encryption

Data is encrypted both in-transit using TLS and at rest.

Vulnerability Disclosure Program

If you believe you've discovered a bug in Envision2bwell Inc's security, please get in touch at security@envision2bwell.io. Our security team promptly investigates all reported issues.
